

Faculty Blackboard Grade Center Guidance

I. Overview

The Grade Center is a powerful tool, designed to help students and faculty effectively monitor academic performance. For students, it provides real-time access to grades, helping them understand how different assignments contribute to their overall course grade, identify areas needing improvement, and set and track academic goals. Instructors benefit from the ability to manage grades efficiently, offer timely feedback, and analyze student performance to tailor support as needed.

Research highlights the value of the Grade Center in enhancing learning. Studies show that regular grade feedback is linked to higher academic achievement, with self-regulation and consistent progress monitoring being key factors in student success. Overall, the Grade Center empowers students to take control of their learning while giving instructors the tools to support and improve student outcomes.

II. Best Practices for Using the Grade Center

Ensuring Grade Center Accuracy

- The Grade Center should accurately reflect the assessments listed in the course syllabus.
- All points, percentages, and assessment titles must align exactly with the language and calculations presented in the "What's Getting Graded" section of the syllabus.
- Consistency between the syllabus and the Grade Center is essential to avoid confusion and ensure that students have a clear understanding of how their performance is being evaluated.
- Grades must be entered regularly as assignments are completed and assessed. This ongoing input keeps students informed about their current standing in the course, allowing them to seek support to ensure progress and use the feedback to improve future assignment submissions.
- Zeros should be promptly entered for any missed assignments. This practice ensures that the Grade Center accurately reflects each student's performance, including areas where they may be falling behind, and prevents any false sense of achievement or standing in the course.

By maintaining an accurate and up-to-date Grade Center, both students and faculty can rely on it as a trustworthy tool for tracking academic progress.

The Importance of Accurate and Consistent Grading

Accuracy

An accurate and up-to-date Grade Center is critical for students to make informed decisions about their academic progress. Clear and current grades reduce confusion, allowing students to see where they excel and where improvement is needed. This insight helps students take proactive steps to enhance their performance in the course, whether by focusing on weaker areas or maintaining strong efforts where they are already performing well. A reliable Grade Center enables students to manage their learning effectively, set realistic goals, and adjust their strategies for academic success.

Fairness

Fairness is also essential and is tied to expectations matching outcomes (Hirsch, 2021). The Grade Center should accurately reflect the assignments listed in the syllabus and provide clear grading criteria, such as rubrics, which outline how to achieve different levels of success. This clarity helps prevent frustration and grade disputes, ensuring students understand expectations before submitting their work. Timely and quality feedback allows students to make necessary adjustments before future assignments, further supporting their path to academic success.

III. Grade Center Expectations for All Faculty

1. **Availability:** The Grade Center must be accessible to students at least one week before the start of the session. This advanced availability allows students to review grading criteria and assignment details ahead of time.
2. **Alignment with the Syllabus:**
 - a. **Assignment Titles:** The titles of assignments listed in the Grade Center must exactly match those specified in the syllabus. This ensures clarity and prevents confusion about which assignments are being graded.
 - b. **Grading Scheme:** The grading scheme used in the Grade Center, whether points or weighted, must be consistent with the grading calculations described in the “What’s Getting Graded” section of the syllabus. This alignment is crucial for accurate grade tracking and reporting.
 - c. **Point Values and Categories:** Each graded event in the Grade Center should have a clear point value assigned and be categorized according to the relevant sections in the syllabus. This includes ensuring that all assignments and assessments are properly allocated to the appropriate categories and that the point values match those outlined in the syllabus.

IV. How to Effectively Use the Grade Center

Choosing ‘Your’ method

The Grade Center is flexible enough so that you can apply the grading method you already use to the columns and schemas within its interface, but it is important that you pick **ONE** method and apply it to every assignment in your course.

Guiding Questions:

- How will I be calculating grades?
- Will I be grading based on a point total?
- Will I be showing students grades on assignments in points, percentages, or letter grades?

Examples:

Below are examples of two primary methods used for calculating grades. Each has a different set of implications for the way columns are constructed in Blackboard, as well as how you will display grades to students.

Points to Calculate Grades

Tests/Papers/Projects/Participation (as appropriate)	Outcome(s) Being Assessed	Point or Percentage Value	Final Grade Scale
Presentations (10 @ 20 points each)	All	200	A = 855-950
Projects (12 @ 15 points each)	All	180	B = 760-854
Homework (12 @ 10 points each)	All	120	C = 665 - 759
Discussion Boards/Participation (10 points each)	All	150	D = 570 - 664
Exam (2 @ 150 points)	All	300	F = Below 570
		Total: 950 points	

The column name should be specific to the assignment and the points should match the syllabus.

* Indicates a required field.

COLUMN INFORMATION

* Column Name

Grade Center Name

Description
For the toolbar, press ALT+F10 (PC) or ALT+FN+F10 (Mac).

Primary Display
Grades must be entered using the selected format. Grades display in this format in both the Grade Center and My Grades.

Secondary Display
This display option is shown in the Grade Center only.

Category

* Points Possible

Associated Rubrics

Weighted Categories to Calculate Grades

Tests/Papers/Projects/Participation (as appropriate)	Outcome(s) Being Assessed	Point or Percentage Value	Final Grade Scale
Quizzes (8)	2, 3, 5, 11, 12, 13, 19, 24, 25, 27	8% total (1% each)	
Worksheets (10)	2, 5, 11, 12, 13, 14,	9% (1% each)	
Final Examination	1, 2, 3, 4, 5, 6, 8,19, 22, 23, 24, 25, 27	20%	90%-100% = A
Observation reflection	3, 7, 10, 17, 18,	14%	80%-89% = B
Knowledge Checks (10)	6, 7, 15, 20, 21	15%	Below 80% = is considered failing
Presentation	26	10%	90%-100% = A
Patient assessment assignment	16	10%	
Research paper	8, 9	14%	
		Total: 100%	

The category or column percentage weights should match the category and weight listed in the syllabus.

SELECT COLUMNS

Select the columns and categories to include in this weighted grade and then set the weight percentages.

Include in Weighted Grade

Columns to Select:

- Project 1: Illustrating Ideas
- Project 2: Gathering Data and Reporting
- Project 3
- Chapter 1 Test
- Chapter 2 Test
- Chapter 3 Test
- Column Information

Categories to Select:

- Observation Reflection
- Problem Set
- Survey
- Test
- Discussion
- Final Exam
- Category Information

Selected Columns:

Enter the weight percentage for each item. Percentages should add up to 100 percent.

* 10 % Category: Patient Assessment Assignment

Weight Columns: Equally Proportionally

Drop Grades OR Use only the

Drop Highest Grades Lowest Value to Calculate

Drop Lowest Grades Highest Value to Calculate

* 10 % Category: Presentation

Weight Columns: Equally Proportionally
