Welcome to G206

The room is set up with an overhead LCD Projector, Computer and VHS / DVD player. A Laptop can also be hooked to the system from both the front and back of the room through the appropriate cables. The room is covered by a wireless access point so laptops with wireless cards can connect to the internet.

Room lights are controlled by the wall switch beside the door. The projector control is on the outside wall of windows. The screen is also a writing surface and requires the use of special markers. The pens for writing on this surface are located to the side of the room beside the Screen / writing wall. Please do not use PERMANENT markers on this writing surface.

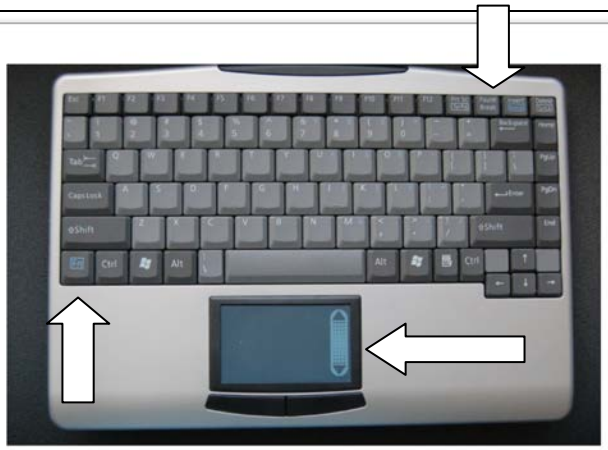
The **Computer** and **VHS/DVD Deck** are located in a cabinet located near the bookcases.
The log-in for the computer is **G206** and **no password**.
A DVD can be played through the computer if needed.

IF YOU EXPERIENCE SOUND PROBLEMS WITH THE COMPUTER- PLEASE CHECK SPEAKER ICON IN SYSTEM TRAY LOCATED IN THE LOWER RIGHT CORNER BY CLOCK AND MAKE SURE IT IS NOT MUTED.

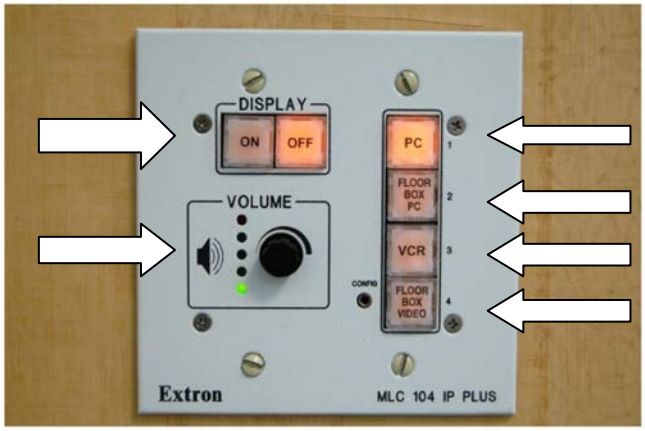
The floor box is located in the front of the room and is located near the wall mounted system controller. A laptop or video device can be connected to the projection system through this and can be selected by using the appropriate button on the wall controller. AC power is also available in this floor box.

The computer has a wireless keyboard and built-in touchpad/mouse similar to a laptop. You must press the **FN** key and touch the **touchpad** to activate the keyboard.

If you need to turn off NUM LOCK press **FN** key and **Blue num lock key** on upper right side of keyboard.



This wall plate is the **Extron system controller**. It is located on the outside wall by windows. The **Display On** and **Off** buttons will activate the projection system. The **PC** button will project the computer located on the small table. The **FLOOR BOX PC** will project a laptop computer if connected to the floor box at the front of the room. The **VCR** button will project a VHS or DVD from the unit in the small table. The **FLOOR BOX VIDEO** will project other devices connected to floor box through the projector. The **VOLUME** button controls volume for the whole system and switches automatically according to which source you choose.



The LCD projector is ceiling mounted. All Computer and video sources can be projected by this unit by selecting the proper input on the wall mounted controller. When you are finished with your presentation please turn the projection system off by pushing the **off** button on the controller.
